HARMONIC MEASURE

John B. Garnett

University of California, Los Angeles

Donald E. Marshall

University of Washington

CONTENTS

PREFACE	p. ix
--------------------------	-------

I. JORDAN DOMAINS

1. The Half-Plane and the Disc	p. 1
2. Fatou's Theorem and Maximal Functions	p. 6
3. Carathéodory's Theorem	p. 13
4. Distortion and the Hyperbolic Metric	p. 17
5. The Hayman–Wu Theorem	p. 24
Notes	p. 26
Exercises and Further Results	p. 26

II. FINITELY CONNECTED DOMAINS

1. The Schwarz Alternating Method	p. 39
2. Green's Functions and Poisson Kernels	p. 43
3. Conjugate Functions	p. 52
4. Boundary Smoothness	p. 62
Notes	p. 69
Exercises and Further Results	p. 69

III. POTENTIAL THEORY

1. Capacity and Green's Functions	p. 77
2. The Logarithmic Potential	p. 81
3. The Energy Integral	p. 84
4. The Equilibrium Distribution	p. 87
5. Wiener's Solution to the Dirichlet Problem	p. 94
6. Regular Points	p. 99
7. Wiener Series	p. 103
8. Polar Sets and Sets of Harmonic Measure Zero	p. 108
9. Estimates for Harmonic Measure	p. 110

Notes	p. 118
Exercises and Further Results	p. 119

IV. EXTREMAL DISTANCE

1. Definitions and Examples	p. 137
2. Uniqueness of Extremal Metrics	p. 141
3. Four Rules for Extremal Length	p. 142
4. Extremal Metrics for Extremal Distance	p. 146
5. Extremal Distance and Harmonic Measure	p. 151
6. The $\int \frac{dx}{\theta(x)}$ Estimate	p. 154
Notes	p. 157
Exercises and Further Results	p. 158

V. APPLICATIONS AND REVERSE INEQUALITIES

1. Asymptotic Values of Entire Functions	p. 165
2. Lower Bounds	p. 167
3. Reduced Extremal Distance	p. 169
4. Teichmüller's Modulsatz	p. 174
5. Boundary Conformality and Angular Derivatives	p. 182
6. Conditions More Geometric	p. 193
Notes	p. 201
Exercises and Further Results	p. 202

VI. SIMPLY CONNECTED DOMAINS, PART ONE

1. The F. and M. Riesz Theorem	p. 209
2. Privalov's Theorem and Plessner's Theorem	p. 212
3. Accessible Points	p. 214
4. Cone Points and McMillan's Theorem	p. 216
5. Compression and Expansion	p. 221
6. Pommerenke's Theorem	p. 225
Notes	p. 230
Exercises and Further Results	p. 230

VII. BLOCH FUNCTIONS AND QUASICIRCLES

1. Bloch Functions	p. 239
2. Bloch Functions and Univalent Functions	p. 242
3. Quasicircles	p. 251
4. Chord-Arc Curves and the A^∞ Condition	p. 255
5. BMO Domains	p. 264
Notes	p. 268
Exercises and Further Results	p. 268

VIII. SIMPLY CONNECTED DOMAINS, PART TWO

1. The Law of the Iterated Logarithm for Bloch Functions	p. 281
2. Harmonic Measure and Hausdorff Measure	p. 283
3. The Number of Bad Discs	p. 293
4. Brennan's Conjecture and Integral Means Spectra	p. 298
5. β Numbers and Polygonal Trees	p. 302
6. The Dandelion Construction and (c) \implies (a)	p. 309
7. Baernstein's Example on the Hayman–Wu Theorem	p. 315
Notes	p. 318
Exercises and Further Results	p. 320

IX. INFINITELY CONNECTED DOMAINS

1. Some Cantor Sets	p. 329
2. For Certain Ω , $\dim \omega < 1$	p. 338
3. For All Ω , $\dim \omega \leq 1$	p. 345
Notes	p. 354
Exercises and Further Results	p. 356

X. RECTIFIABILITY AND QUADRATIC EXPRESSIONS

1. The Lusin Area Function	p. 361
2. Square Sums and Rectifiability	p. 375
3. A Decomposition Theorem	p. 387
4. Schwarzian Derivatives	p. 395
5. Geometric Estimates of Schwarzian Derivatives	p. 399
6. Schwarzian Derivatives and Rectifiable Quasicircles	p. 409

7. The Bishop–Jones $H^{\frac{1}{2}-\eta}$ Theorem	p. 413
8. Schwarzian Derivatives and BMO Domains	p. 423
9. Angular Derivatives	p. 426
10. A Local F. and M. Riesz Theorem	p. 430
11. Ahlfors Regular Sets and the Hayman–Wu Theorem	p. 436
Notes	p. 441
Exercises and Further Results	p. 441

APPENDICES

A. Hardy Spaces	p. 451
B. Mixed Boundary Value Problems	p. 456
C. The Dirichlet Principle	p. 463
D. Hausdorff Measure	p. 472
E. Transfinite Diameter and Evans Functions	p. 483
F. Martingales, Brownian Motion, and Kakutani’s Theorem	p. 486
G. Carleman’s Method	p. 496
H. Extremal Distance in Finitely Connected Domains	p. 500
I. McMillan’s Twist Point Theorem	p. 513
J. Bloch Martingales and the Law of the Iterated Logarithm	p. 518
K. A Dichotomy Theorem	p. 528
L. Two Estimates on Integral Means	p. 533
M. Calderón’s Theorem and Chord-Arc Domains	p. 536

BIBLIOGRAPHY	p. 549
-------------------------------	--------

AUTHOR INDEX	p. 583
-------------------------------	--------

SYMBOL INDEX	p. 589
