Northwest Mathematics Interaction
Summer Programs

Week-Long
Summer Geometry Institute
40 hours of classroom activities
August 3 - 8

Two-Day Minicourses
Five separate courses on specialized topics
August 4 - 5 and 6 - 7

Comment from a previous participant:
"Thanks to NCTM Standards I understood the need for reform. I could talk the talk, but I did not have the teaching skills or methods to implement reform. Now my students enjoy and understand math. They can think mathematically. Often parents call me or the principal to comment on their kids newly found interest in math. I now teach other teachers how to use the methods and lessons I learned from NWMI."
