Worksheet #2
due in class Friday, October 5, 2007

Worksheet Problems: Consider each problem below with your group. Write your answers clearly as if you were explaining it to a classmate. Do as much as you can during the remaining class time and hand in your work at the end of class.

1. Who wrote this paper? What is their motivation? Discuss in group.

2. Outline the algorithm you would use to verify the results in Table 6 by simulating your own data. Do you need additional data?
