Index

$C^1$ solution, 18
$\varepsilon$-approximate solution, 21
$k$-step LMM, 47

$a priori$ estimate, 20
accurate of order $p$, 41
adjoint system, 30
approximate $\delta$-function, 89
approximate identity, 89
autonomous system, 19
basis
orthonormal, 74
bounded, 17
pointwise, 13
characteristic polynomial, 45
closed linear span, 70
closed subspace, 68
coefficients
Fourier, 72
compact exhaustion, 63
complete orthonormal set, 74
conditions
initial, 8
conjugate exponents, 62
consistency, 41, 42
consistent LMM, 49
constant
Lipschitz, 9
continuity, 22
continuous, 18
locally Lipschitz, 16
contraction, 9
Dahlquist root condition, 49
differentiability, 22, 25
differential operator
linear, 28
equation
integral, 8
equation of variation, 24
equations
parabolic, 87
equicontinuous, 13
error
local truncation, 41
exhaustion
compact, 63
explicit, 47
exponents
conjugate, 62
finite domain of dependence, 83
fixed point, 9
fixed-point iteration, 9
formal series, 76
Fourier coefficients, 72
Fourier series, 76
Fourier Transform, 91
functional iteration, 9
fundamental matrix, 28
fundamental modes, 84, 86
fundamental set, 28
general solution of (LH), 31
general solution of (LI), 31
Hilbert space, 67
homeomorphism, 27
identity
approximate, 89
implicit, 47
initial conditions, 8
inner product space, 66
integral equation, 8
isomorphism
unitary, 74
iteration
    fixed-point, 9
    functional, 9
kernels
    summability, 77
Lebesgue measurable, 56
linear, 24
linear differential operator, 28
linearization, 24
Lipschitz constant, 9
local truncation error, 41
locally Lipschitz continuous, 16
matrix
    fundamental, 28
measurable
    Lebesgue, 56
modes
    fundamental, 84, 86
normalized at time \( \tau \), 31
one-step LMM, 50
operator
    linear differential, 28
orthogonal set, 71
orthogonality, 68
orthonormal basis, 74
orthonormal set, 72
    complete, 74
parabolic equations, 87
particular solution of (LI), 31
perturbation equation, 24
point
    fixed, 9
pointwise bounded, 13
polynomial
    characteristic, 45
    trigonometric, 76
problem
    well-posed, 39

Ordinary Differential Equations (ODEs)

rapidly decreasing function, 99
seminorm, 61
series
    formal, 76
    Fourier, 76
set
    complete orthonormal, 74
    fundamental, 28
    orthogonal, 71
    orthonormal, 72
space
    Hilbert, 67
    inner product, 66
span
    closed linear, 70
stability, 42, 43
summability kernels, 77
trace, 29
trigonometric polynomial, 76
Uniform Boundedness Principle, 71
uniformly Lipschitz continuous with respect to \( x \), 9
unitary isomorphism, 74
wave equation, 80, 81
well-posed problem, 39
Wronskian, 29, 35
zero-stable LMM, 50
