Office hours: Wednesday 5:30–6:30, Friday 11:15–12:15, and by appointment. My office hour on Wednesday will be in the Math Study Center in Communications B-014. The Math Study Center is open at least 40 hours per week and is a good place to go for help with the coursework. You are encouraged to make use of this resource.

Your TA will announce his office hours in quiz section.

Text: Calculus, Early Transcendentals, 5th edition, by James Stewart. This book is available at the University Bookstore. A packet of worksheets and homework problems is available in the Copy Center in B-042 of Communications; this material is also available online at http://www.math.washington.edu/~m125/. This web site is the same web site as the site you get to by clicking on “Math 125 Materials Website” from my home page. It is very important that you can access both my web site and the general Math 125 web site as some information may only appear online.

You will also need a scientific calculator. Graphing calculators will not be allowed on tests.

Homework: I will be assigning most of the problems from the homework sheets. Specific assignments will be given at the beginning of most lecture periods; you may also find the assignments on my web site by clicking on “Assignments and Announcements” under “Math 125”. Homework will normally be handed in each Thursday in quiz section. On most Thursdays, you will be doing a worksheet in quiz section, and that will be handed in at the end of class. (Please bring a copy of the relevant worksheet to quiz section each Thursday, but do not work through it beforehand.) Although your TA will grade only a small number of the homework problems, it is important for success on the quizzes and exams that you are able to do the homework accurately (and efficiently). The only way to gain this proficiency is by conscientiously working through the assignments. I will drop your lowest score in computing your homework grade. No late homeworks will be accepted.
Exams: There will be two midterm exams, given in quiz section Thursday, October 20 and Thursday, November 17. I reserve the right to change (under exceptional circumstances) exam dates; ample notification will be given. The final exam is a common final and is scheduled for Saturday, December 10 from 1:30–4:20. The room will be announced later.

No make-up exams (except for the final) will be given. Only under unavoidable emergencies (e.g., illness, death in family), which should be documented, will you be allowed to miss a midterm exam without penalty. Normally, such an absence from the final exam (provided the make-up cannot be taken) will result in a grade of Incomplete, assuming you are doing passing work at the time. In certain other situations (e.g., athletic meets, religious observances), it may be possible to take an exam early. This must, however, be set up at least 10 days in advance.

Please keep your old exams in case there are any future questions related to your course grade.

Finally, note that photo identification may be required for the midterm and final exams.

Grading:
Homework and Worksheets: 15%
Midterms: 45%
Final: 40%

The grade of I (incomplete) will be given only under the conditions in the University of Washington General Catalog (under "Grading Systems").
