Additional corrections will be gratefully received at folland@math.washington.edu.

Page 2, line −7: $a_n \to \alpha_n$
Page 3, line 1 after “Function Spaces”: dente → denote
Page 12, line 14: $e^{1/(1-t^2)} \to e^{1/(t^2-1)}$
Page 16, line 5: reamins → remains
Page 18, line −6: graddaddy → granddaddy
Page 43, second-to-last displayed equation: $\partial_{j}^{t} \to \partial_{t}^{j}$
Page 43, last displayed equation: $|\alpha_{j}| \to |\alpha_{j}|$
Page 61, Lemma 1.53: You can replace $(d/2)^{k}$ by $d^{k}$, and the proof is trivial. (Exercise!)
Page 69, line 2: $C^{1} \to C^{2}$
Page 77, line −7: Insert “the final paragraph of” before “§4B.”
Page 84, line 12: (2.31) → (2.32)
Page 87, line 7: $\delta(x, y) \to \delta(x - y)$
Page 87, first line after Claim (2.38): calleed → called
Page 91, line 1: (2.37) → (2.40)
Page 97, second display in proof of Theorem 2.48: $\omega_{n-1} \to \omega_{n}$
Page 97, next line after preceding item: (2.44) → (2.46)
Page 99, line −10: $P_k \Delta \overline{P}_j \to \overline{P}_k \Delta P_j$
Page 100, line −10: ser → set
Page 100, line −1: proerties → properties
Page 105, lines 9 and 14: $\frac{n-1}{r} \to \frac{n-1}{r} f'(r)$
Page 109, Exercise 5, Hint: $e^{i\theta} \to e^{i k \theta}$
Page 112, line −5: corvilinear → curvilinear
Page 118, Remark, line 2: $C^{1} (\Omega) \to C^{2} (\Omega)$
Page 119, last line of proof of Prop. 3.6: right → left
Page 121, line −3: (3.11) → (3.10)
Page 133, Exercise 1: The asserted formula for $u(x)$ should be multiplied by $R^{n-1}$ (including the case $n = 2$).
Page 134, Exercise 2: The integrand of the second integral should be $f(y)N(y)$.
Page 145, line 4: $K(x, t) \to K(x - x_0, t_0 - t)$ (two places)
Page 150, lines 1 and 2: \( k_{\psi} \rightarrow \kappa_{\psi} \)

Page 173, formula (5.22): \( \frac{1}{1^{3} \cdots (n-1)} \rightarrow \frac{2}{1^{3} \cdots (n-1)} \) and \( \int_{|y|=1} \rightarrow \int_{|y|\leq 1} \)

Page 174, formula (5.24): \( \partial_t u - \Delta u \rightarrow \partial_x^2 u - \Delta u \)

Page 175, line 4 and line -3: \( \partial_t v - \Delta v \rightarrow \partial_x^2 v - \Delta v \)

Page 177, line -6: \( \partial_t \tilde{u}(\xi, t) \rightarrow \partial_t \tilde{u}(\xi, 0) \)

Page 192, line 9: if \( \rightarrow \) of

Page 194, line 3 of Proof: \( \|f\|_s \rightarrow C\|f\|_s \)

Page 195, next-to-last line of Remark 1: Example 1 \( \rightarrow \) Example 2

Page 201, lines 9 and 11: \( f_{kj} \rightarrow \hat{f}_{kj} \)

Page 203, line -8: \( (1 + t^2)^{(s-1)/2} \rightarrow (1 + t^2)^{(s-1)/2} \)

Page 204, line -4: \( u \rightarrow f \)

Page 205, lines 5, 7, and 8: \( u \rightarrow f \)

Page 207, line 2: \( \|\phi\|_{s-x} \rightarrow \|\phi\|_{s+x} \)

Page 208, line 6: There should be no restriction on the support of \( g \) in this formula. However, let \( \phi \) be a function in \( C^\infty_c(\Theta^{-1}(\Omega'_1)) \) with \( \phi = 1 \) on \( \Theta^{-1}(\Omega'_0) \); then \( \int (f \circ \Theta)g = \int (f \circ \Theta)\phi g \), so one can replace \( g \) by \( \phi g \) in the subsequent argument. Since the map \( g \mapsto \phi g \) is bounded on \( H_s \) for all \( s \), this yields the desired estimate in the end.

Page 208, line -5: ony \( \rightarrow \) any

Page 210, formula (6.27): \( |\alpha| \leq k \rightarrow |\alpha| = k \)

Page 212, lines 9 and 10: \( |\alpha| \leq k \rightarrow |\alpha| = k \)

Page 218, line 2: (6.30) \( \rightarrow \) (6.33)

Page 224, line 8: \( \int_N(r) \rightarrow \int_{N(r)} \)

Page 225, line 1: if \( \rightarrow \) of

Page 225, Theorem (6.47): \( S \rightarrow \partial \Omega \) (two places)

Page 227, Exercise 1: \( \Omega \) should be \( \{re^{i\theta} : -\pi < \theta < \pi, \frac{1}{2} < r < 1 \} \).

Page 231, display before (7.3): \( \partial^\alpha u \rightarrow \partial^\beta u \)

Page 235, line -6: (5.6) \( \rightarrow \) (7.6)

Page 245, line 9 of proof: \( |\alpha|-m+j \rightarrow m-|\alpha|+j \)

Page 274, line 2: \( \phi = 1 \) on \( \text{sing supp } u \rightarrow \phi = 1 \) on a neighborhood of \( \text{sing supp } u \)

Page 280, line -7: \( D^\beta_\xi \rightarrow D^\alpha_\xi \)
Page 287, line 9: \( d\eta \rightarrow dy \)
Page 289, next-to-last line of proof of Corollary (8.32): \( \Psi^{-\infty} \rightarrow S^{-\infty} \)
Page 290, line 3 of proof: \( u(x)v(y) \rightarrow u(y)v(x) \)
Page 293, line 4: then then \( \rightarrow \) then
Page 305, line 3: and and \( \rightarrow \) and
