

Pre-Presentation Homework

Folding the Pinwheel Tetrahedron

Please fold 7 of these units for class on Monday 3/7

In step number 7, you will want to fold the two triangular legs into the center as they have shown—this will form a square shape and will prepare the edges for what will use them for on Monday. You need not fold across the diagonal of that square as the middle arrow suggests.

If you get stuck this weekend please email:

natelo@u.washington.edu , or leipper@u.washington.edu
