

You may turn this homework in physically or electronically. To submit it physically, hand in a copy at the start of class before the weekly quiz. To submit electronically, please email a PDF (**not** a Word document!) to the course grader, Yue Zhao, at [zhaoy28@uw.edu](mailto:zhaoy28@uw.edu).

The homework problems are from Sundstrom's *Mathematical Reasoning*, available here:

<https://scholarworks.gvsu.edu/books/9/>

For this assignment, please solve:

- Chapter 5.1, page 225–228, problems 3, 6, 11, 12, 14.

For extra practice, I recommend completing the progress checks in chapters 5.1. (Don't hand in the progress checks. Just think about the problems on your own. You can look up solutions in the back of the book.)
