

## A Carrot Conundrum

*by Jonah*

Please pack the lunch box below with four kinds of vegetables (peas, baby carrots, jicama, and string beans) while obeying the following rules:

- Each square must be covered by a vegetable. Peas cover one square, carrots cover two, jicama three, and string beans four, as shown below:

- No two vegetables of the same type occupy horizontally or vertically adjacent spaces.

Cover the small icons with matching full-size vegetables. A vegetable may cover zero, one, or several icons.
