

A Shroomy Stumper

by Jonah

Here at Shroomy Skewers, we place mushrooms in grids while obeying the following rules:

- Each square must contain a **button** mushroom, **oyster** mushroom, or **portobello** mushroom.
- Each skewer must either hold 3 mushrooms of the same type, or 3 mushrooms of all different types.
- Horizontally or vertically adjacent mushrooms that do *not* share a skewer must have different types.

Please place mushrooms in the remaining squares of this grid.
